Q1

Python is a high-level interpreted programming language used for general-purpose programming. Features include easy syntax, dynamic typing, and a large standard library.

Q2

A list is mutable, which means its elements can be changed. A tuple is immutable, so its elements cannot be modified after creation. Lists use square brackets [] and tuples use parentheses ().

Q3

```
n = 5
fact = 1
for i in range(1, n + 1):
    fact = fact * i
print(fact)
```

Q4

Object-Oriented Programming is a programming paradigm based on objects and classes. The four principles are Encapsulation, Inheritance, Polymorphism, and Abstraction.
